LOCATIONS

NEW YORK
PARIS
The Digital Leadership Experience is for seasoned, highly accomplished professionals who want to pursue a new professional or personal objective that requires proficiency in digital knowledge. This one-year experience at the Columbia University Center for Technology Management allows for the specialized, customizable design of a part-time program that is integrated with each person’s objective.

Each individual’s objective will culminate in a capstone (final) project. This could involve various elements:

- Business plan
- Social benefit
- Documentation
- Marketing and distribution
- ...And others as needed

Accepted individuals can begin at any time and shape their education either on campus or from the comfort of their home without having to follow a specific track or academic calendar. A range of optional activities will be held in our New York or Paris locations.

Participants who complete the program will become a Digital Associate of the Columbia University Center for Technology Management. Digital Associates are lifetime members of the Center, continuing their network expansion through affiliation with future associates and participation in Center events.
THE UNITED NATIONS

The Columbia University Center for Technology Management and the United Nations are working closely together on the United Nations Technology Innovation Lab (UNTIL) program with the goal of using innovative technology to address some of humanity’s most pressing needs.

This exciting collaboration will function as a start-up environment and will create a synergistic platform for problem-solving between UN resources, academia, and the private sector.

Digital leaders, faculty, and members in our program who are interested in social goals may have an opportunity to work on a digital project for the United Nations to solve problems faced by the UN or its Member States. The United Nations’ Sustainable Development Goals are listed below.

MENTORSHIP

The Center for Technology Management is home to more than 230 technology mentors who are high-level executives and industry leaders with diverse experiences.

Individuals will meet periodically with assigned mentors to receive guidance on their capstone project and to discuss career information or digital trends.

Our mentors can be found throughout the world and provide proactive support, lectures, and counsel on technology challenges and trends. They represent industries including financial services, entrepreneurship, health care, pharmaceuticals, consumer goods and retail, insurance, government, media, and more.

Current mentors include representatives from more than 200 companies such as JetBlue, Morgan Stanley, Omnicom, J.Crew, Johnson & Johnson, Centene Corp., Vice Media, Sony Music, and other organizations all over the globe.

Visit [ctm.columbia.edu/content/mentors](http://ctm.columbia.edu/content/mentors) to learn about our network. The individuals listed below are just a few of our illustrious mentors.
